I'm in a position in life where nothing prevents me from seeking help.	It's 50/50. Some things need to be said out loud so the person can really get a better understanding of their struggle others should keep it private if it really has a deep and personal meaning to them.	No	If it helps you why not.	An app that makes you take screen time breaks. Get off the phone and you will be less depressed. Go and talk to people, socialize, learn a skill.	Feeling lazy

3/7/2026 23:53:07	Senior	Yes	Increased exam difficulty and workload	Exercise	Financials, busy schedule, stigma	Extremely important	Yes, campus counseling is a free resource and is encouraged in a lot of student orgs.	Less likely to use an app. Would rather have an actual doctor.	Live chat, variety of professionals to reach out to	a situation where therapy with a real counselor isn't reasonable. As a full time student working a job, therapy isn't on my list of priorities at the moment.
